## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's Amendment filed on 12/01/2005 has been entered. Claims 1-5 have been amended. No claims have been cancelled. No claims have been added. Claims 1-5 are still pending in this application, wherein claims 1 and 3-5 being independent.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huck (US Pat No. 6,985,576) in view of Mayer et al (US Pat No. 5,539,809), herein after referred as Mayer.

Regarding claim 1, referring to figure 1, Huck teaches a system for relaying communication to a plurality of receiver-side telephones (e.g., agents 48-58) connected to a local area network (e.g., LAN 18);

said repeating device comprising a function, effected at a time of an incoming call to be connected, for requesting that each receiver-side telephone unit of said plurality of receiver-side telephones then response indicating their availability to receive a call, a function for selecting out of the plurality of receiver-side telephones that responded a telephone to which the call is to be connected (see col. 2, lns 46-59; and col. 8, lns 51-59; and col. 9, lns 12-20).

Huck differs from claimed invention in which he does not teach a function for notifying the address of the selected receiver-side telephone to a caller-side telephone. However, Mayer teaches a function for notifying the geographical location (e.g., address) of a call recipient party (e.g., receiver-side telephone) to a caller-side telephone (see col. 1, lns 34-49). Therefore, integrating Mayer's teachings into communication system of Huck would be useful to the caller.

Regarding claim 2, Huck teaches repeating device according to claim 1, wherein said device further comprises a function for receiving a transfer request from a user (see col. 2, lns 46-59; and col. 8, lns 51-59; and col. 9, lns 12-20).

As to claims 3-5, they are rejected for the same reasons set forth to rejecting claims 1 and 2 .

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
